Professional Summary

Hands-on Full Stack Developer and Software Engineering student with a strong foundation in building robust, scalable web and mobile applications. Proficient across the entire development lifecycle—from designing responsive UIs with React Native and Tailwind CSS to implementing secure backend APIs using Node.js, Express, and MongoDB. Experienced in deploying real-world projects that prioritize performance, accessibility, and privacy. Adept at troubleshooting complex issues, optimizing workflows, and integrating third-party services like Firebase for authentication and data management. Passionate about ethical tech, community-driven learning, and delivering solutions that make a meaningful impact.

Work Experience

Junior Full Stack Developer — Freelance & Personal Projects Injibara, Ethiopia · Jan 2022 – Present

Developed end-to-end web and mobile applications using modern frontend and backend technologies including React Native, Node.js, Express.js, and MongoDB.

- Designed and implemented responsive, user-friendly interfaces using HTML, CSS, Tailwind CSS, and JavaScript frameworks.
- Built RESTful APIs and integrated third-party services such as Firebase for authentication, real-time data, and cloud storage.
- Applied version control and collaborative workflows using Git and GitHub across multiple solo and team-based projects.
- Optimized application performance and accessibility across devices, with a focus on privacy-conscious and offline-first solutions.
- Led branding and deployment of educational platforms and community tools via Telegram and YouTube, reaching diverse audiences.

• Continuously expanded technical capabilities through hands-on experimentation, ethical automation, and open-source contributions.

Education

Injibara University, Software Engineering Student 2021 – Present

• **(In progress)**

Professional Skills

Frontend Technologies

- HTML5, CSS3, JavaScript
- React Native
- Bootstrap, Tailwind CSS
- Responsive Web Design & Cross-Device Optimization

Backend Technologies

- Node.js, Express.js
- RESTful API Development & Integration
- Firebase (Authentication, Realtime Database)
- Database Management (MongoDB, MYSQL)

Development Tools

- Git & GitHub (Version Control)
- Web Development Frameworks (MERN Stack)
- Cross-platform Mobile Development
- Agile & Project-Based Collaboration

Projects

Key Projects

- **Netlify Clone:** Recreated core deployment platform features including drag-and-drop site uploads, automated builds, and live previews using modern frontend and backend technologies
- **Amazon Clone:** Built a fully functional e-commerce platform with product listings, shopping cart, checkout flow, and user authentication using MERN stack
- **Zoom App:** Developed a video conferencing application with real-time audio/video streaming, user management, and secure meeting rooms using WebRTC and Firebase.
- **Hotel Booking App** Created a full-featured reservation system with room listings, booking calendar, user authentication, and admin dashboard.
- **Weather App:** Integrated real-time weather data APIs to deliver location-based forecasts with a responsive UI and dynamic visuals.
- **Calculator Applications:** Designed and implemented both scientific and basic calculators with clean UI, accurate logic handling, and cross-device compatibility.

- **Doctor's Appointment Booking App:** Built a healthcare scheduling platform enabling patients to book, reschedule, and manage appointments with real-time availability tracking.
- **Chat Application** Engineered a real-time messaging app with user authentication, live chat rooms, and message persistence using Firebase and Socket.io. and others including personal portfolios with different design.
