Portfolio GitHub LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Developer with hands-on experience architecting and delivering production-grade web applications across the MERN ecosystem. Skilled in translating business requirements into scalable, maintainable software through clean component architecture, secure RESTful API design, and efficient relational and non-relational data modeling. Demonstrated ability to independently manage the full software development lifecycle — from requirements gathering and system design through deployment and post-launch support. Currently advancing formal expertise through a BSc in Software Engineering at Injibara University, complemented by continuous upskilling in modern development practices, cloud integration, and emerging technologies.

WORK EXPERIENCE

Full Stack Developer — Freelance & Independent Projects

Injibara, Ethiopia · January 2023 – Present

- Architected and delivered 10+ production-grade web and mobile applications end-to-end using React, Node.js, Express.js, and MongoDB to meet diverse client requirements.
- Designed secure, scalable RESTful APIs with JWT authentication, integrating Firebase for real-time data sync and cloud-based file storage.
- Engineered real-time, low-latency features using WebSockets and Socket.io, including live messaging and peer-to-peer video conferencing.
- Built fully responsive, accessibility-conscious UIs with Tailwind CSS and Bootstrap, ensuring consistent performance across all devices.
- Maintained disciplined Git/GitHub workflows and applied Agile methodologies to manage scope, timelines, and iterative delivery.

EDUCATION

BSc in Software Engineering — Injibara University

2022 – Present · Currently Enrolled

TECHNICAL SKILLS

Frontend Development

HTML5 CSS3 JavaScript (ES6+) React.js Tailwind CSS Bootstrap Responsive Design

Backend Development

Node.js Express.js RESTful API Design JWT Authentication Firebase Socket.io WebRTC

Database Management

MongoDB MySQL PostgreSQL Database Schema Design

Tools & Workflow

Git GitHub VS Code Postman Figma Vercel Netlify Docker (Basics) Agile / Scrum

KEY PROJECTS

HRMS — HR Management System

MERN Stack

Enterprise platform managing employee records, attendance tracking, payroll processing, and role-based access control through a secure administrative dashboard.

Food Delivery Platform

MERN · Maps API

End-to-end ordering system with real-time order tracking, restaurant management tools, and live delivery status updates.

Payments: TeleBirr, Chapa, and Mobile Banking integration for seamless local checkout.

RMS — Restaurant Management System

React · Node.js · MongoDB

Operations platform covering table reservations, order management, inventory tracking, and real-time sales reporting for restaurant staff and management.

Hotel Management System

React · Node.js · MongoDB

Full reservation and operations suite featuring room inventory, a visual booking calendar, automated billing, and staff administration tools.

Amazon Clone — E-Commerce Platform

MERN · Stripe

Full-featured online store with product catalog, persistent shopping cart, secure checkout flow, and complete order history tracking.

Video Conferencing Application

WebRTC · Firebase

Real-time peer-to-peer video and audio streaming platform with secure, authenticated meeting rooms and participant management.

Doctor Appointment Booking App

MERN · Firebase

Healthcare scheduling system enabling patients to book, reschedule, and track appointments with live availability synchronization.

Real-Time Chat Application

Socket.io · Firebase

Messaging platform with persistent chat history, authenticated user sessions, and live online-presence indicators.
